Projects

Trade Reconciliation & Settlement Dashboard

Trade Reconciliation & Exception Management | Excel

- Automated reconciliation of 40 simulated trades between internal ledger and custodian statements using XLOOKUP, INDEX-MATCH, and conditional formatting, catching 9 settlement breaks with 100% accuracy.
- Built an exception dashboard flagging quantity, price, and missing-trade mismatches, cutting manual trade-verification time 70% (100 to 30 minutes per batch).

Sun Pharma – Organon M&A Analysis

Mergers & Acquisitions Financial Analysis | Corporate Finance

- Modeled Sun Pharma's ~USD 230 million acquisition of Organon using DCF, comparables, and synergy analysis, estimating an 18–25% acquisition premium and 2–4% revenue synergy potential.
- Built pro-forma post-merger model projecting 2–5% EPS accretion over 2 years and post-acquisition Debt/EBITDA below 1.0x.

Three-Statement Financial Model (TCS)

Integrated Financial Modelling | Equity Research

- Built an integrated 3-statement model (Income Statement, Balance Sheet, Cash Flow) forecasting 5-year revenue CAGR of ~9% at 24–25% margins.
- Ran DCF valuation estimating ₹4,850 intrinsic value against a ₹4,500 market price, flagging 7–8% upside.

Stock Portfolio Tracker

Investment Portfolio & Performance Tracker | Excel Dashboard

- Built an Excel tracker managing 12 stocks and 65+ transactions via pivot tables and lookup functions, cutting manual tracking effort 80%.
- Tracked simulated portfolio performance, generating an 18.6% annual return vs. the Nifty 50's 14.2%.

AML Investigation Dashboard

AML Risk Investigation & Monitoring Dashboard

- Built an AML scoring framework across 500+ customer records by risk score, country risk, and transaction behavior, flagging 47 high-risk accounts (9.4%) for investigation.
- Built a monitoring dashboard cutting average case-review time 67% (120 to 40 minutes), improving alert prioritization.
